**Section 4: First-Aid Measures**
**Description of first aid measures:**

**Eyes:** Immediately flush with water for at least 15 minutes, lifting the upper and lower eyelids intermittently. See a medical doctor or ophthalmologist immediately.

**Skin:** Quickly wipe off as much as possible, then immediately flush with plenty of water while removing contaminated clothing and/or shoes. Thoroughly wash with soap and water. Obtain immediate medical attention. Contact a medical doctor if necessary.

**Ingestion:** Quickly wipe material from the mouth and rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. See a medical doctor immediately.

**Inhalation:** Remove to fresh air. If breathing difficulty or discomfort occurs and persists, see a medical doctor. If breathing has stopped, give artificial respiration and see a medical doctor immediately.

**Most important symptoms and effects, both acute and delayed:**

Lithium metal reacts violently with water and is corrosive to the eyes, skin and respiratory tract. Treatment should first remove as much of the material as possible as quickly as possible, then flush with very large quantities of water.

**Indication of any immediate medical attention and special treatment needed:**

**Notes to medical doctor:** This product is corrosive and reacts violently with water. Treatment should first remove as much of the material as possible as quickly as possible, then flush with very large quantities of water. Ingestion presents a singular problem as emesis may produce oesophageal damage and/or aspiration damage. Dilution with water or other water-containing materials may produce a reaction that exacerbates the corrosive activity. Consideration may be given to gastric lavage with a large diameter tube for removal of material and then dilution with large amounts of water. Esophagoscopy may be of assistance in this procedure and to assess extent of damage. Treatment is otherwise symptomatic and supportive.

**Section 5: Fire-Fighting Measures****Extinguisher media:**

**Extinguishing media:** Dry chemical, CO<sub>2</sub>, water spray or regular foam.

**Section 6: Accidental Release Measures****Personal precautions, protective equipment and emergency procedures:**

**Personal precautions:** Before clean-up measures begin, review the entire SDS with particular attention to Section 2, Hazards Identification; and Section 8, Exposure Controls/Personal Protection.

**Environmental precautions:** Do not wash into drains. Dispose of at a qualified waste disposal facility.

**Methods for containment and cleaning up:**

Remove all sources of ignition. To prevent ignition, cover with mineral oil (or kerosene), soaking thoroughly, and place in oiled steel drums which are approved for transport. Keep water and moisture away from spilled material. Dispose of waste according to local and Federal laws and regulations.

**Reference to other sections:**

Treat recovered material as described in the section "Disposal considerations".

**Section 7: Handling and Storage****Precautions for safe handling:**

**Advice on safe handling:** Wear safety glasses or goggles and dry rubber gloves. Where relative humidity is maintained below 50%, or lithium surface is coated with mineral oil, lithium pieces can be handled in open atmosphere at room temperature. To maintain best quality, humidity levels of less than 2% are recommended.

**Conditions for safe storage, including incompatibilities:**

Store in original unopened shipping container. Once opened, store in argon atmosphere or mineral oil. Keep away from water, humid air, acids and oxidizing materials. Keep away from heat, sparks and flame.
