In case of inhalation: Material may be irritating to mucous membranes and upper respiratory tract; may be harmful if inhaled.

In case of skin contact: May cause skin irritation.

In case of eye contact: May cause eye irritation.

In case of ingestion: May be harmful if swallowed.

Most important symptoms and effects, both acute and delayed:

General advice: Take the victim out of the contaminated area. Remove contaminated clothing immediately and dispose of safely.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing becomes difficult, call a physician.

Eyes: In case of contact with eyes, flush with copious amounts of water for at least 15 minutes. Assure adequate flushing by separating the eyelids with fingers. Call a physician.

Skin contact: In case of contact, immediately wash skin with soap and copious amounts of water.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Do NOT induce vomiting. Call a physician.

Indication of any immediate medical attention and special treatment needed: Treat symptomatically. Show this safety data sheet to a physician or emergency room.

Section 5: Fire-Fighting Measures

Extinguisher media:

Suitable extinguisher media: Dry powder Dry sand, or appropriate foam. Do NOT use water jet.

Unsuitable extinguishing media: Magnesium oxide.

Special hazards arising from the mixture: Pyrophoric material. Emits toxic fumes under fire conditions.

Advice for fire-fighters: Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

Further information: Standard procedure for chemical fires. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Section 6: Accidental Release Measures

Personal precautions, protective equipment and emergency procedures:

Personal precautions: Exercise appropriate precautions to minimize direct contact with skin or eyes and prevent inhalation of dust. Avoid breathing vapours, mist or gas. Remove all sources of ignition. Particle filter half mask, filter P3.

Environmental precautions: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. Local authorities should be advised if significant spillages cannot be contained.

Methods for containment and cleaning up:

Methods for cleaning up: Collect with an electrically protected vacuum cleaner or by wet-brushing, place in a suitable, closed containers and hold for disposal according to local regulations. Avoid raising dust. Do not flush with water. Ventilate area and wash spill site after material pickup is complete.

Elimination of recovered materials: Deliver to the Environmental service of the factory or to any specialized and approved disposal company.

Reference to other sections:

Treat recovered material as described in the section "Disposal considerations".

Section 7: Handling and Storage

Precautions for safe handling:

Advice on safe handling: User Exposure: Avoid inhalation. Avoid contact with eyes, skin, and clothing. Avoid prolonged or repeated exposure. Take precautionary measures against electrostatic loading. Provide appropriate exhaust ventilation at places where dust is formed. Keep away from sources of ignition - No smoking.

Hygiene measures: Do not eat, drink or smoke when using this product.

Conditions for safe storage, including incompatibilities:

Requirements for storage areas and containers: Keep tightly closed in a dry and well-ventilated place. Air and moisture sensitive. Store in cool place. Store under inert gas. Keep away from oxidising agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.

Advised packaging material: Glass, polyethylene, polypropylene.

Section 8: Exposure Controls/Personal Protection

Control parameters:

Occupational exposure limits: No data available.

Exposure controls:

Appropriate engineering controls: Safety shower and eye bath. Mechanical exhaust required.

Individual protection measures, such as personal protective equipment:

Eye/face protection: Chemical safety goggles.

Hand protection: Use chemical resistant gloves. Examples of preferred glove barrier materials include: Butyl rubber, Neoprene, Nitrile/butadiene rubber, Polyethylene, Ethyl vinyl alcohol laminate, polyvinyl alcohol, Polyvinyl chloride.

Body protection: Wear appropriate protective clothing to prevent skin exposure. Flame retardant antistatic protective clothing.

Respiratory protection: Wear dust mask. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
