Suitable extinguishing media: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special risks: Flammable. Use water spray to cool unopened containers.

Special protective equipment for firefighting: Wear protective equipment if required for other materials within the immediate vicinity.

Section 6: Accidental Release Measures

Personal precautions, protective equipment and emergency procedures:

Use personal protective equipment as required. Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas.

Environmental precautions: Avoid release to environment. Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

Methods and materials for containment and cleaning up:

Sweep up and shovel. Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container for disposal according to local regulations (see section 13). Keep in suitable, closed containers for disposal. Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal according to local regulations (see section 13).

Section 7: Handling and Storage

Precautions for safe handling:

No Specific requirements. Platinum powder like other fine powders should be handled using established procedures that minimise the production of inhaled dust. Wear appropriate nationally approved respirators if handling is likely to cause the generation of inhalable dust. Wear suitable protective clothing and gloves. Contaminated work clothing should not be allowed out of the workplace. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed. Keep away from sources of ignition. **NO SMOKING.**

Conditions for safe storage, including any incompatibilities:

Keep container tightly closed in a dry and well-ventilated place. Store in cool place. Local regulations should be followed regarding the storage of this product.

Section 8: Exposure Controls/Personal Protection

Control parameters:

Occupational exposure limits:

Component	CAS-No.	Value	Control parameters	Basic
Platinum	7440-06-4		TWA 1 mg/m ³	USA - ACGIH Threshold Limit Values (TLV)
<i>Remarks: Upper respiratory tract irritation / asthma</i>				
			TWA 1 mg/m ³	USA - OCHA - TABLE Z-1 Limits for Air Contaminants - 1910.1000
			TWA 1 mg/m ³	USA - NIOSH Recommended Exposure Limits
			TWA 0.0020 mg/m ³	USA - Occupational Exposure Limits (OSHA) - Table Z-1 Limits for Air Contaminants

Platinum (dust): UK WEL (mg/m³) 5, ACGIH TLV-TWA (mg/m³) 1

Soluble Platinum: UK WEL (mg/m³) 1, ACGIH TLV-TWA (mg/m³) 0.002.

Exposure controls:

Appropriate engineering controls: Mechanical extraction ventilation may be required if user operations change it to other physical or chemical forms, whether as end products, intermediates or fugitive emissions, which are inhalable. Maintain airborne dust levels as low as possible. Wash hands before breaks and at the end of workday.

Individual protection measures, such as personal protective equipment:

Respiratory protection: Where risk assessment shows air-purifying respirators are appropriate use a fullface particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Eye protection: Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Hand & Skin Protection: The selected protective gloves must satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it. Handle with gloves. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash skin thoroughly after handling and before eating, drinking or smoking. Change contaminated clothing frequently. Launder clothing and gloves as needed.

Body Protection:

Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Control of environmental exposure:

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
